## WESTLAKE RESIDENT SURVEY RESULTS SET NEW HIGH FOR NATIONWIDE AVERAGES

Recent survey results reveal 85 percent of Westlake residents are "satisfied" or "very satisfied" with the overall quality of government services, according to data from one of the nation's leading community-based market research firms. The ETC Institute conducted the survey during the summer to help Town leaders make critical decisions concerning the allocation of Town resources, to measure the effectiveness of Town services, and to help decide the future direction of the community. Along with the Composite Customer Satisfaction Index at 127, much higher than the national average of 100, the Town of Westlake set new satisfaction highs in four areas. Emergency preparedness efforts received an overall satisfaction of 96 percent, compared to the U.S. average of 67 percent; communications received 92 percent versus the U.S. average of 50 percent; customer service received 90 percent satisfaction versus 54 percent in the U.S.; and code enforcement was rated at 78 percent satisfaction versus the U.S. average of 49 percent. This was the fifth time the Town of Westlake administered the resident survey, which was sent to residents via mail and phone. Previous surveys were administered in 2009, 2010, 2011, and 2013. Assistant Town Manager Amanda DeGan said she is very pleased with the results as it reinforces that Town staff are providing the services and quality that residents value.
